

# Project Information

## 67th Avenue Bike Lanes Project: Missouri Avenue to Cholla Street

June 6, 2023, 4:30 p.m. to 6:30 p.m.

Location: Cottonwood Elementary School, 11232 N 65<sup>th</sup> Avenue

### Project Purpose

The objective of the project is to improve mobility for Glendale's residents by creating a safer bicycling environment that expands transportation modal options and connectivity.

### Project Overview

This project will install bicycle lanes on a five-mile section of 67th Avenue between Missouri Avenue and Cholla Street. The bicycle lanes will be installed within existing roadway cross section by narrowing travel and turn lanes.

In 2019, the City of Glendale completed its Active Transportation Plan (ATP). The ATP provides a blueprint for establishing a complete active transportation network that encourages physical activity, emphasizes regional connectivity, is equitable, and provides residents with transportation choices. Adding bicycle lanes to the 67th Avenue corridor is a high-ranking improvement identified in the ATP.

This public meeting provides you with the opportunity to review the project design and provide your input.

### Next Steps

Project construction is anticipated to begin in November of this year. Construction activities should be complete by early Fall of 2024.

### Your Input is Sought!

Please provide your input on the project by completing a Project Input form available at the "Comments" table during the public meeting. The survey will also be available after the meeting on the project webpage:
