**LOW-INCOME FAMILIES MAY BE ELIGIBLE FOR REPAIRS  
ON EXISTING AC/ UNITS OR EVAP COOLERS**

**GLENDALE, Ariz.** – The climbing summer temperatures this week makes everyone want to seek cool shelter. The hot weather also increases wear and tear to evaporative coolers and home air conditioning units. For high-risk groups, including the elderly and small children, it is critical that these units are operating properly.

The city of Glendale utilizes federal Community Development Block Grant (CDBG) funds to provide much-needed emergency repair assistance to qualified, low-income families and elderly who are Glendale residents. Some of the most requested calls for service during the warm weather months include repairs to existing air conditioning or evaporative coolers, but other examples of the types of repairs could be electrical, mechanical or plumbing.

The city's Emergency Home Repair Program utilizes a non-profit partner, Community Services of Arizona (CSA) to provide emergency repair services.

To qualify, applicants must own and occupy the residence, and meet income requirements based on family size and program criteria. Funding is limited; repairs are approved on a case-by-case basis depending on the type and severity of the emergency.
