City Offers Free Energy Classes

GLENDALE, Ariz. – Glendale’s Environmental Resources Department has taken on a new component to its mission: energy efficiency outreach and education, which has been made possible by an Energy Efficiency Conservation Block Grant (EECBG) from the federal Department of Energy. The new energy outreach program and the current water conservation program will merge to offer the expanded “Conservation and Sustainable Living” series of classes.

A portion of the EECBG funding allows the city to provide free homeowner classes.

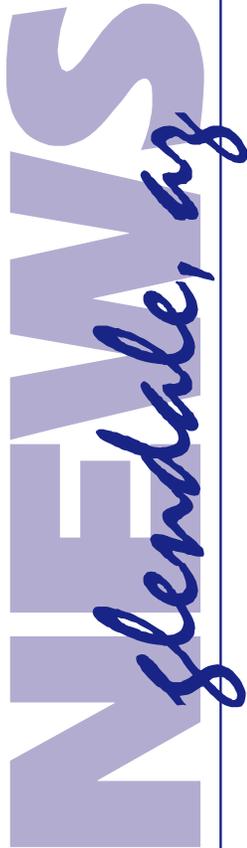

Saturday, September 25, Foothills Library, 19055 N. 57th Ave.

12:30-1:45 p.m. – Assessing Your Home’s Energy Use: Find out what areas in your home can help you save money and discuss what resources and rebates are available to you.

1:45-3 p.m. – Earth-Friendly Landscape Renovations: Create an earth friendly and “green” backyard while reducing your energy and water bills.

3-3:30 p.m. – Programmable Thermostats: Learn how to install and program a thermostat to maximize the heating and cooling efficiency in your home. Residents who complete this class will receive a programmable thermostat to install in their home.

The energy classes will be repeated and a class on Solar 101 will be offered at the Glendale Main Library at 5959 W. Brown St. on October 30th. Registration is required for the free classes 623-930-3760. For a complete listing of the
