GLENDALE INSTALLS NEW DYNAMIC MESSAGING SIGNS *New signs will improve traffic flow in downtown area*

GLENDALE, Ariz. – Glendale Transportation is installing new dynamic message signs (DMS) for traffic approaching the city's downtown area, to alert drivers of traffic restrictions or delays that may lie ahead.

The new DMS will be located at the following spots:

- Eastbound Glendale approaching 67th Ave
- Westbound Glendale approaching 51st Ave
- Northbound 59th approaching Bethany Home Rd
- Southbound 59th approaching Northern Ave

Residents and drivers in these areas will see the structures being installed currently, with an anticipated completion in January 2015. The signs are designed to distribute information for drivers that will help alleviate traffic congestion as well as traffic delays. Messages will include train delay notifications, street closures, event-related traffic information and travel times.

Technology like these signs will assist the public traveling to events in the downtown Glendale area, like the Glendale Glitter & Glow Block Party on Jan. 10 and the Glendale Chocolate Affaire on Jan. 30-31.

For additional information about this, and other transportation projects in Glendale, visit www.glendaleaz.com/transportation.
