Unique Playground to be Unveiled in Glendale

GLENDALE, Ariz. – A very unique playground will be unveiled at 4 p.m., Friday, March 2 at Sahuaro Ranch Park, 59th Avenue and Mountain View Road. This playground is the first one of its kind in the world.

Landscape Structures, a premier provider of innovative playground equipment, donated the playground to Glendale. This is the first suspended playground in the world providing a unique play experience for children ages 5 and older. The suspended, spherical design provides more physical and mental challenges than traditional play structures and can be accessed anywhere along its 73-foot length and 40-foot width. Climbing nets, gliders, suspended rings, pods, spring benches and a banister slide are part of the components that make up this structure that promotes health and fitness while playing. Children have to use their muscles to pull, climb and push their body weight through this suspended structure.

Landscape Structures Inc. of Delano, Minn. is a 35-year-old, employee-owned company with over 300 employees. Since 1971, the company has designed, manufactured and installed over 35,000 playgrounds and Skatewave™ skateparks across North America and around the globe. This company strives to create a continuous play concept for children.

The unveiling will feature Glendale dignitaries and representatives from Landscape Structures. The public is welcome to attend. Pizza and water will be served.
